

Mountain View Cemetery Diagram

See that the Cemetery is divided into 9 sections. These sections do not correspond to the Map of Plots maintained by the City of Marlinton, but were assigned to follow road features that would aid visitors to navigate to a given grave without another reference.

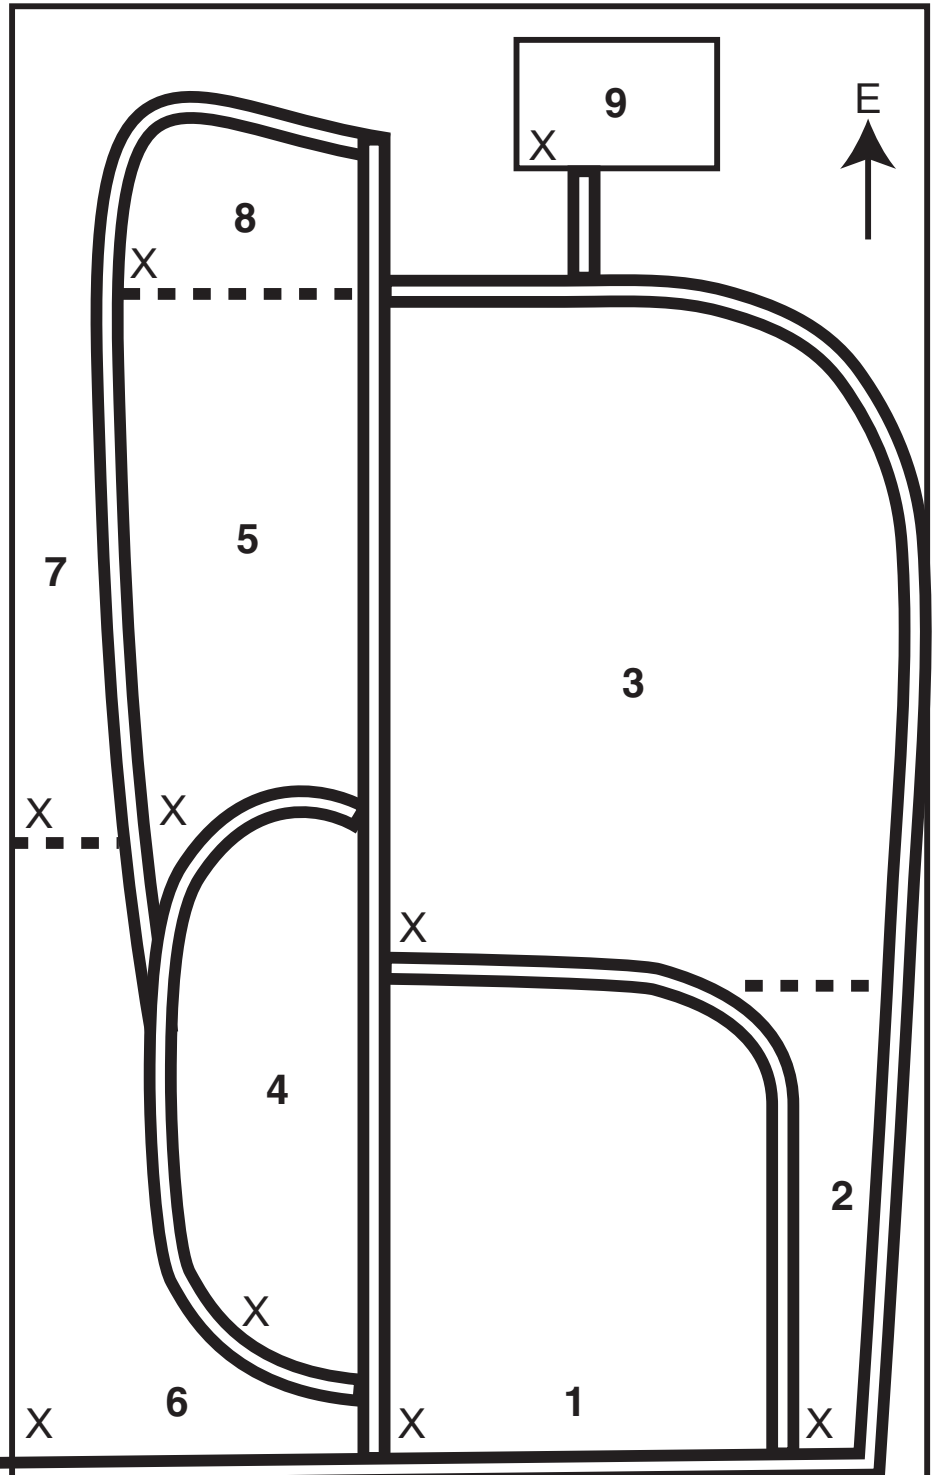

From the Entrance the flow of grave rows is from West to East with Row Numbers advancing, and Grave Addresses running North (left) to South (right).

So an address will be Section / Row / Grave. eg. 3/12/15. The grid is not perfect for at different times there were different practices for plot spacing and aisles, and section borders are irregular.

Rows are given 1/2 numbers – .5 – if the graves are not in good alignment with the leftmost starting grave. This has happened when new sections opened or within a Family Plot. If grave sites are not used or marked that space has been skipped in an attempt to keep the numbers more aligned from row to row.

X's mark the starting point in each section.

Remember that tombstone engravings and obituaries are authored by family and friends, so that a legal name might not appear on either.
